YESTERDAY, Sept. 22.—P. M.	
This was another active day in the stock market. The transactions at the Stock Exchange aggregated 680,614 shares against 490,000 shares yesterday and 627,000 shares on Monday. Again there was an immense amount of profit realizations, sufficient to give to the market a feverish tone, but the offered stocks were absorbed at small concessions, and prices quickly rallied when the pressure to sell abated. As a rule the final figures are immaterially changed from those of last evening, and there are more small gains than losses. Philadelphia and Reading was a leading feature in the day's operations, and after selling at 37 closed at 36 1/2 against 34 last evening. Lake Shore was a favorite of the day and sold up 1 1/2 cent to 92 1/2, while New York Central and Hudson was quoted at 91 1/2. Michigan Central sold up at 11 1/2 against 11 1/2 last evening. Michigan Southern was quoted at 87 1/2, but its closing figure of 85 1/2 was lower than 87, but its closing figure of 85 1/2 was higher than 85 1/2 from yesterday's closing. The granger stocks were comparatively quiet and give small changes in their final figures. New York and New-England ruled strong. It opened up 1 1/2 cents to 45 1/2, sold up to 45 1/2 again to 45 1/2 and closed at 45 1/2. Union Pacific was dull and after fluctuations of 1 cent closed unchanged at 60 1/2. Missouri, Kansas and Texas was unusually active and records a final advance of 4 1/2 per cent at 31 1/2. Erie was bought by no clique, but it established an advance of 4 1/2 per cent. Columbus, per Hocking Valley and Toledo rose 2 1/2 per cent to 34 1/2 and closed at 34. The clique in Peoria, Decatur and Evansville stock devoted their operations all day to the depression of its price; it sold down from 31 3/4 to 29, was offered at 29 and closed at 29 1/2—making a decline of 1 1/4 per cent from last evening. Still it is true that the higher figures of last autumn it declined less than any other stock on the list and there are few stocks which in the advance from last winter are the equal of Peoria, Decatur and Evansville. The market is the equal of the public or the average professional operator. A conservative operator remarked to-day at the moment when prices were about their lowest and when the speculation looked little like a "run" that "This market is not a run, you know, it is a buy, as you think it is." This is Lieben's province to run through the events of the day and not to run or manage them. The market has not been able to change its situation and Lieben's Thimbles pointed them out. Perhaps the market has not broadened; but the stock transactions of the last three days aggregate 1,700,000 shares, or one-third the sum of the total transaction of the week ended on September 4. Almost every person that I spoke to said that the cliques are running large, and yet after these large transactions and the heavy realizing there are few stocks that tend to do well from a position of strength more than they did last evening. The last report is that they have encouraged the creation of a moderate "short" interest during the last two days, but not enough to cause a downward accident. The stock market is assuming a more natural shape. Stocks are being well distributed and confidence in values is more general than it was a week ago. The market closed irregular and feeble.	

Government bonds were dull and only steady with the rise for the 4 per cent 1/2 per cent. Annexed are the closing quotations:
